

ALEXANDRA COLLEGE
DUBLIN

Campus and facilities

Our commitment to provide the best educational, cultural and sporting facilities to our students reflects our belief and experience that a broad and stimulating learning environment helps our girls to fulfil their potential during and after their time at the College.

Alexandra College is set on an attractive and secure 12-acre campus in Milltown, just 6 kilometres from Dublin city centre. It is well served by public transport, with bus and Luas tram services stopping at the school gates.

The fact that the girls are taught in many different buildings gives a very real sense of a university campus. The main teaching buildings in the junior and senior schools emanate from a central concourse, which lends a real sense of community to the College. There is always something going on in the concourses and this gives the schools a great atmosphere all the time.

In the science building dedicated laboratories and equipment are used to teach biology, chemistry, physics and agricultural science. Girls are encouraged to go beyond the curriculum and enter the Young Scientist and Sci Fest competitions.

Reflecting the importance of music in the life of the College we have a dedicated music building with ten rooms available for tuition and practice, where girls can learn and play without distraction or interruption.

In the College restaurant diners get menus with a wide choice of food, including soups, salads, hot-plate specials, sandwiches, fruit, coffee, tea and pastries. Vegetarian and ethnic options are catered for and diners also learn about the local produce they are eating on menu boards located in the restaurant.

The Henrietta White Centre is a state-of-the-art hall of sufficient size to serve as an indoor sports venue while doubling as a high-quality performance space for both music and drama. We can present shows and performances to audiences on a regular basis, and our girls have a great opportunity to learn and appreciate the many aspects involved in staging shows

As well as a gymnasium and the multi-purpose hall, the campus also has extensive outdoor sports facilities, including:

- Two hockey pitches – one water based and one sand dressed
- All-weather hockey, tennis and basketball facilities
- Pitches for athletics, soccer, cricket and rugby

Excellent facilities

The well-appointed campus has separate buildings for:

- Junior School
- Senior School
- Science
- Music
- Restaurant and café
- Two residence buildings
- Multi-purpose hall
- Gymnasium
